SUITABLE

Light Zone

Safety Is a Choice You Make

Lightzone Butane Gas 400ml

Lightzone EXPLOSION PROOF designed Butane Gas Canister integrated with DOUBLE Safety Feature of " **Rim Vent Release** " (RVR) valve and "**Triple Seaming Release** " (TSR) for stronger structure aerosol can.

A SAFETY DESIGN "Rim Vent Release" (RVR) on gas cartridges that releases pressure through the rim when overpressure occurs, preventing explosion.

How does "Triple Seaming Release" work?

TSR is a safety device that releases pressure through the triple-seamed top structure during overpressure or overheat-ing. Its stronger seam maintains a stable and secure seal longer under overpressure, helping the RVR achieve controlled pressure release and prevent explosion.

- Align the collar notch of the canister with the Locator Tab and lock as per device instruction.
- Suitable to use in market all type of Portable Gas Cooker & Torch Jet Flame Gun.
- Replace the red cap during storage of the unfinished canister.
- Do Not Remove the canister while using in the device.
